Vineyard Structure
Located at the foothills of the Andes Mountain range, native alluvial soil. Grown in a 20 years old organic vineyard, with high density of vines (4200 Pl/ha), and low yield (7.000 - 8.000 Kg/ha). Drip irrigation assures that each plant receives the exact amount of water necessary.

WINEMAKING

Grape Selection
Natural and concentrated. After waiting until the perfect moment the grapes are hand harvested at the optimum ripeness.

Elaboration, Fermentation, Storage
The wine is fermented in stainless steel tanks, at times increasing the temperature to achieve complex notes and marmalade aromas. Once fermentation finishes, it undergoes a prolonged maceration, which is the secret to this wine, so the outcome has a present body, volume and smooth structure.
